

# Visit our virtual nexy booth

03/12/2020

We deeply regret the cancellation of this year's [LogiMAT](#) intralogistics and process management fair due to the increased risk of infection with the coronavirus and the fact that, unlike in other years, we are unable to see you in Stuttgart. In order to facilitate a personal exchange and present our new products to you despite this development, we have created a digital version of our fair booth.

Visit our [virtual booth](#) and find out more about our new wireless sensor network solutions. Online we will show you various applications in state-of-the-art factories, for example automated material flow using our [nexy eKanban system](#) or optimised automated guided vehicle (AGV) fleets incorporating automatic "wake-up" signals based on our sWave.NET® wireless technology. Via the wireless network, inactive or unused AGV can be put into a "deep sleep" mode requiring next to no power.

We deeply regret the cancellation of this year's [LogiMAT](#) intralogistics and process management fair due to the increased risk of infection with the coronavirus and the fact that, unlike in other years, we are unable to see you in Stuttgart. In order to facilitate a personal exchange and present our new products to you despite this development, we have created a

digital version of our fair booth.

Make today the day you visit our [virtual](#) booth or contact us at [nexy@steute.com](mailto:nexy@steute.com) and make an appointment to speak to us in person in times of coronavirus also by phone.

We look forward to hearing from you!
